TEST REPORT

Print Date & Time : 31/12/25 6:35 PM

Name	: Mrs Archana Rane	Reg No.	: 251212300347
Age & Sex	: 46 Years / Female	Reg. Date	: 31/12/2025
Referred By	: Dr Santosh Rane	Collected on	: 31/12/2025
Client	: Analytica Laboratory	Reported on	: 31/12/2025

Complete Blood Count

Parameter	Result	Bio. Ref. Interval	Units
RBC Parameters			
Hemoglobin	: 12.3	12.0-15.0	g/dl
PCV (Hematocrit)	: 39.1	36-46	%
RBC Count	: 4.53	3.8-4.8	mil/cumm
MCV	: 86.3	83-101	fl
MCH	: 27.2	27-32	pg
MCHC	: 31.5	31.5-34.5	g/dl
RDW-CV	: 13.1	11.6-14	%
WBC Parameters			
WBC Count	: 5630	4000-10000	/cumm
Neutrophils	: 58	40-80	%
Lymphocytes	: 33	20-40	%
Eosinophils	: 03	1-6	%
Monocytes	: 06	2-8	%
Basophils	: 00	0-1	%
Platelet Parameters			
Platelet Count	: 234000	150000-450000	/cumm
MPV	: 9.9	7.5-12.0	fl
Peripheral Smear			
RBC	: Normocytic,Normochromic		
WBC	: Normal In Count And Distribution		
Platelet	: Normal In Count And Morphology		
Impression	: Normal Blood Picture

TEST REPORT

Print Date & Time : 31/12/25 6:35 PM

Name : **Mrs Archana Rane**
Age & Sex : 46 Years / Female
Referred By : Dr Santosh Rane
Client : Analytica Laboratory

Reg No. : **251212300347**
Reg. Date : 31/12/2025
Collected on : 31/12/2025
Reported on : 31/12/2025

HAEMATOLOGY

Parameter	Result
Glycosylated Hemoglobin (HbA1c)	
HbA1c Result	: 5.78
Estimated Average Glucose (EAG)	: 119.19

Hemoglobin A1c is a glycosylated hemoglobin, the rate of formation of which is directly proportional to the level of glucose in the blood. It represents average blood glucose over a period of 6 - 8 weeks.
The Estimated Average Glucose (EAG) is calculated using the formula [EAG = (HbA1c x 28.7) - 46.7].
In known diabetic patients, monitoring of glecemic control can be considered using the following values
Excellent Control: 6 - 7 %
Fair to Good Control: 7 - 8 %
Unsatisfactory Control: 8 - 10 %
Poor Control: >10 %

Reported on : 31/12/2025

ENDOCRINOLOGY

Parameter	Result	Bio. Ref. Interval	Units	Method
Thyroid Profile				
Total T3 (Triiodothyronine)	: 0.83	0.50-2.00	ng/ml	Clia
Total T4 (Thyroxine)	: 7.94	4.8-11.6	ug/dl	Clia
TSH (Thyroid Stimulating Hormone)	: 1.50	Day 1 - Day 4: 1 - 40 Day 5 - 1 Month: 1.3 - 16 1 Month - 1 Year: 0.9 - 7.7 1 Year - 12 Years: 0.6 - 5.5 > 12 Years and Adults: 0.39 - 6.16	uIU/ml	Clia

Note
It is recommended that the interpretation of Thyroid Profile (Thyroid Function Test) be carried out along with the individual's clinical findings. TSH levels in the blood are subject to Circadian rhythm and show variation depending on the time of blood collection, the same should be noted while interpeting the results.

Clinical use
1. Diagnosis of Hypothyroidism and Hyperthyroidism,
2. Monitoring of Thyroid replacement therapy / Thyroid suppression therapy

(Extremely low levels of serum TSH have to be interpreted with caution as there is a genetic variant of the protein which is functionally normal but can escape immunological detection while using the Immunoassay technology.)

ENDOCRINOLOGY

Parameter	Result	Bio. Ref. Interval	Units
25-OH Vitamin D3			
Result	: 88.10	Severe Deficiency > 0–10 Deficiency > 10–20 Sub-optimal > 20–30 Optimal > 30–50	ng/ml
Method	: Chemiluminescence Immunoassay (CLIA)		

Vitiamin D(Cholecalcifiero) is an essential nutirienti fior bone and tieetih mineralization and is needed fior optimal calcium and phosphorus absorption firom tihe intiestines

25 OH Cholecalcifierol is a derivative ofi Cholecalcifiero, tihe levels ofi which in tihe blood are detiermined by exposure tio sunlight, liver and kidney fiunction, Skin pigmentiation, and use ofi sunscreen

Deficiency in children leads tio Ricketis (Ill fiormed bones) and in Adultis leads tio Ostieomalacia (Weak bones)

Excess levels ofi Vitiamin D can be seen in people witih long durations ofi exposure tio sunlight. Toxicitiy is usually seen ati levels above 150 ng/ml.
